JEE Main

10 Years Questions with detailed Solutions

Dear Students,

JEE (Joint Entrance Examination) Main is a national-level entrance test for admission to government engineering colleges like NITs, IIITs, State engineering colleges, and many more reputed Private colleges across India. It is also a gateway to appearing in JEE Advanced examination, which leads to admission to IITs. It is conducted by the National Testing Agency (NTA) every year in one or more sessions. Every year, more than 10 lakhs of students appear in this exam, making it one of the most competitive examinations in the country.

If you want to crack this exam, you will need an intelligent strategy apart from just studying hard. Also, one of the most important parts of a smart strategy is to solve and analyze the previous year's question papers of JEE Main. The key to any preparation for a difficult entrance exam is to identify time-saving strategies, patterns, and levels of questions that may be asked, and then practice in a similar manner. Examining the previous year's test questions is a productive method of JEE Main preparation. This boosts your self-assurance and enables you to plan how to allocate your time effectively in order to improve your performance.

Careers360 has collected all the past 10-year question papers (2017-2026) of JEE Main and compiled them digitally to make an E-book. After collecting the question paper, our expert faculty of respective subjects solved the whole question paper, which consists of 14060 questions of Physics, Chemistry, and Mathematics. Then, after the exhaustive verification, we are releasing this E-book. This E-book has question papers with detailed solutions for the last 10 years that were held in different online and offline sessions. This E-book is helpful for all the aspirants who are preparing for JEE Main and all other engineering examinations in India. Practice each and every problem of the last 10 years JEE Main and structure your preparation around them and get the maximum benefit from them.

All the best!!
